## Product Description

---

This book cover the syllabi of Contraction Engineering for Degree as well as Diploma students and is also useful for practicing engineers. Construction covers varies forms of activities ranging from houses to high rise buildings, industrial structures, road construction, expressways, bridge, dams barrages, runways, ports, canals, railways etc. These high value projects involve management of materials, equipment human and financial resources, information system, control management etc. In today's modern technology projects, there is need for detailed planning and management techniques, and with the growing use of machinery, it has become necessary for construction engineers to be thoroughly familiar with the working application and upkeep of the wide range of the modern equipment. Understanding the basic needs of academia and industry requirements, this book is divided in to 16 chapters namely.

---

## Table of Contents

---

### Contents

1. Management,
2. Construction, Its Management and Operation,
3. River Training Work for Construction Management,
4. Work Study,
5. Contracts and Tender,
6. Project Management Technique (CPM/PERT),
7. Quality Control and Inventory,
8. Forms for Concrete Structure,
9. Prefabricated Structures,
10. Management of Demolition Works,
11. Construction Equipment Basics,
12. Earth Moving Equipment,
13. Hauling ( Transportation) Equipment,
14. Concreting Equipment,
15. Pumping and Dewatering Equipment,
16. Hoisting Equipment (Lifting and Elevating Equipments, and Cranes.
