

Introduction to Security of Cyber-Physical Systems

Author : Jeeva Jose

ISBN 13 : 978-93-55380-58-6

ISBN 10 : 93-55380-58-5

E-ISBN 13 : 978-93-55380-58-6

Edition : First

Pages : 368

Type of book : Paperback

Weight (g) : 600.00

Year : 2023

Language : English

Publisher : Khanna Publishing House

Price : Rs 239.00

Categories : [All book](#), [Computer Science Engineering](#)

Condition Type : New

Country Origin : India

Product Description

Salient Features of this book:-

- Covers Complete AICTE syllabus of Security of Cyber Physical Systems (IOT-O2) minor change degree course .
- The basic of security and various types of security issues are explained
- Different cryptography techniques and various security attacks are discussed.
- Network security and how they are implemented in real world is demonstrated.
- Insight to various issues of web security and biometric authentication provided.
- Each chapter is provided with objective questions with answers and review questions.
- The full form and explanation of the abbreviations used are given in each chapter.

Table of Contents

Introduction to Security
of Cyber-Physical Systems

Author

Jeeva Jose Dr. Jeeva Jose completed Ph. D. in Computer Science from Mahatma Gandhi University, Kerala, India and is a faculty member at BPC College, Kerala. Her passion is teaching and areas of interests include world wide web, Data Mining and Cyber laws. She has been in higher education for the last 15 years and has completed three research projects funded by UGC and KSCSTE. She has published more than twenty research papers in various refereed journals and conference proceedings. She has edited three books and has given many invited talks in various conferences. She is a recipient of ACM-W Scholarship provided by Association for Computing Machinery, New York. **Vijo Mathew** Vijo Mathew </p>

Type of book : Paperback

Weight (g) : 510.00

Year : 2022

Language : Marathi

Publisher : Khanna Publishing House

Price : Rs 344.00

Categories : [AICTE Prescribed Textbooks](#), [All book](#), [Marathi Books](#)

Condition Type : New

Country Origin : India

Product Description

This textbook is designed as per the model curriculum of AICTE for the first year students of all branches of undergraduate programme in Engineering & Technology (BE/BTech).

The subject of programming for problem Solving aims at developing problem solving skills among the students and the skills to create programs in C language for their implementation.

This book emphasizes to empower the students to grasp the skills required for problem solving and to develop deep understanding of the constructs of C language. These aspects of the subject are well illustrated through enormous solved programming problems.

Salient Features:

| Simple and lucid language that enables students to grasp the subject.

| Demonstrates the elegant programming style.

| 165+ ready to run programs for reference and to illustrate the program development process.

| 135+ Short answer type questions to provide an opportunity for self-assessment of the fundamental concepts learned by answering them precisely.

Product Description

Internet of Things (IoT) is a network comprising of machines, vehicles, home appliances, computers, micro controllers, sensors and actuators supported by application software and protocols. The study of IoT is the detailed understanding of these components. As per the estimates, by 2020 the connected things in IoT network will outnumber human beings in earth. Practical applications of IoT Technology is in every area like agriculture, construction management, health care, energy, transportation, education etc. The opportunity in business and job for IoT is increasing day by day.

Product Description

R programming is an efficient tool for statistical analysis of data. Data science has become critical to each field and the popularity of R is skyrocketing. Organizations as large and diverse as Google, Facebook, Microsoft, Bank of America, Ford Motor Company, Mozilla, Thomas Cook, The New York Times, The National Weather Service, Twitter, ANZ Bank, Uber, Airbnb etc. have turned to R for reporting, analyzing and visualization of data, this book is for students and professionals of Mathematics, Statistics, Physics, Chemistry, Biology, Social Science and Medicine, Business, Engineering, Software, Information Technology, Sales, Bio Informatics, Pharmacy and any one, where data needs to be analyzed and represented graphically. **Salient features of the book**

- Explains R concept in a simple method.
- Best self-study material and reference guide.
- Teaches how to apply various statistical methods to data science.
- Help statistician and professional to leverage strength by combining their domain expertise with data analysis capability of R.
- More than 300 solved and tested programmes provided.
- A comprehensive book covering all areas of R in detail.

Table of Contents

Chapter 1: Introduction Chapter 2: Data Types & Operations Chapter 3: Flow Control Chapter 4: Functions and Packages Chapter 5: Charts and Graphs Chapter 6: Connecting R to External Interfaces Chapter 7: Elementary Statistics Chapter 8: Tests of Hypotheses Chapter 9: Non Parametric Tests Chapter 10: Analysis of Variance Chapter 11: Basic Multivariate & Analysis Chapter 12: Advanced Multivariate Analysis Chapter 13: Advanced Graphs

[Chemical Engineering](#), [UNIVERSITY RECOMMENDED](#)

Condition Type : New

Country Origin : India

Product Description

This book is students friendly. It also demonstrates how to solve the industry related problems that crop up in Chemical Engineering Practice. The chapters are organized in a simple way that enables that students to acquire and in depth understanding of the subject. The emphasis is given to the fundamental of measuring instrument, Laplace Transform, Basic Concept of process control, first order and Second order system, Control of Industrial Bio-processes, Controller and Final control elements, Block diagram reduction techniques, Determination of Stability of a process, Advanced control techniques and control Structure of unit operations, all coming under the realm of Process Control. Apart from the numerous illustrations, the book contains review questions, exercises and aptitude test in chemical Engineering which bridge the gap between theoretical learning and practical implementation. All numerical problems are solved in a systematic manner to reinforce the understanding of the concepts. This book is primarily intended as a textbook for the under graduate students of Chemical Engineering, It will also be useful for other allied branches such as Medical Electronics, Aeronautical Engineering, Polymer Science and Engineering, Bio-technology as well as diploma in Chemical Engineering.

Table of Contents

Chapter 1: Instrumentation Fundamental

Chapter 2: Pressure Measurements

Chapter 3: Temperature Measurements

Chapter 4: Flow Measurements

Chapter 5: Level Measurements

Chapter 6: Laplace Transform

Chapter 7: Basic Concept of Process Control and First Order System

Chapter 8: First Order System in Series

Chapter 9: Second Order System

Chapter 10: Industrial Bio-processes

Chapter 11: Controllers and Final Control Elements

Chapter 12: Block Diagram and Transient Response of Closed Loop Control System

Chapter 13: Stability

Chapter 14: Advanced Control Techniques

Chapter 15: Control Structure of Unit Operations

Answer to Exercise Problems

Appendix

Index

Author

D.C. Sikdar D. C. Sikdar (Ph.D.) is an associate professor, Department of Chemical Engineering, Dayananda Sagar College of Engineering, Bangalore, with more than two and half decades of teaching experience. Prof. Sikdar has published many papers in national and international journals of repute. he has received Best Research Thesis Award from Karnataka State Bio-fuel Development Board for guiding M.Tech Thesis on "Development of Bio-Hydrogen Dependent Fuel Cell using Micro Algae" in 2012. Prof. Sikdar is also a member of Indian Society of Technical Education (ISTE) and Indian Institute of Chemical Engineers (IIChe).
