#### **Product Description**

The book Information Security-A Practical Approach, is a strenuous attempt taken by the authors to encapsulate concepts of Network-Security. Information security, something shortened to InfoSec, is the modification, inspection, recording or destruction of information. This book provides a rudimentary and firsthand knowledge on Information Security pertaining to the standards and procedures available in Information Security, the implementation of security and authentication algorithms which is the need of the hour for the small scale industries. The components of the chapters give a perspicuous view on confidentiality, integrity, availability, policy and its various types, encryption, decryption and so forth to cater not the needs of the working professionals and entrepreneurs as well. Especially the chapter on case studies provides hands on experience and reiterates the significance of protecting data and information. The prime objective of this book is to enable the entrepreneurs of Small Scale Industries to ensure secrecy and privacy of information. There has been a vast study on physical security and network security whereas information security is the latest process that gains momentum. We feel obliged to share our knowledge, analysis and recommendations through this manual which will create awareness among the entrepreneurs, about the paramount important of Information Security and to understand the easiest way to implementation those algorithms.

Dr. V. Vasudevan is Registrar and senior professor of Kalasalingam Academy of Research and Education, Krishnankoil, Srivilliputtur, Virudhunagar district, Tamilnadu, India. He complete his PhD in Madurai Kamaraj University, Madurai, Tamilnadu. His area of interest includes Discrete Mathematics, Network Security, Cloud computing, Big Data Analytics, Internet of Things etc. He has more than 34 years of Teaching and Research Experience. He has more than 100 publications in national and international reputed journals. He received D.Litt award from International Economics University (SAARC Countries). He was honored with Dr. APJ ABDHUL KALAM AWARD for Life Time Contribution in Teaching and Research. He is a life time member of ISTE. He received National Information Technology Awareness Award from government of India. He supervised 16 PhD thesis. Dr. S. Dhanasekaran finished his Under Graduate Degree, B. E., in Computer Science and Engineering from Madurai Kamarajar University, Tamilnadu, with first class in the year 2004. He received Post Graduate Degree M.E., (CSE) in First class with Distinction from Annamalai University, Tamilnadu in the year 2007. He secured his Academic career as Lecturer in Department of IT in Arulmigu Kalasalingam College of Engineering (AKCE) in 2008. Now he has been working as Associate Professor in the Department of CKE, Kalasalingam University. He has completed Ph.D., (Cloud Computing) in the year 2017 at Kalasalingam University. He is highly motivated, well-disciplined professional with 11years of Teaching Experience in the area of Computer science & Engineering. He is a Life time member of ISTE and IEEE. He received the Best Research paper Award, Teaching Competence Award, Faculty Advisor ship Award and Motivational Awards for 100% Attendance in the Academic Year(2015-16) at Kalasalingam University. He acted as a Resource person and convener for conducting various FDP, Conference, and Workshops. Moreover he has publishing more than 20 Research papers in which SCOPUS- and SCI Indexed Journals with Impact Factor. Dr. B. S. Murugan Received the Undergraduate Degree (B.Tech) in Information Technology from Anna University, the Post Graduate degree (M.Tech) in Information Technology from SRM University and Ph.D in Information Technology (Cloud Computing) from Kalasalingam University. He has more than 10 publications in National, International Conference and International Journal proceedings. He has 10 years of teaching experience. His areas of interest include, Cloud Computing, Big Data, Operating Systems and DBMS etc. He has undergone training in Regional Remote Sensing Service Centre, Indian Space Research Organization, Bangalore. He received the 'Best Motivator'' award from Indian Medical Association (IMA) Madurai branch. He i a life time member of ISTE. He is currently working as Associate Professor in the Department of Computer Science and Engineering at Kalasalingam Academy of Research and Education, Krishnakoil, Srivilliputtur, Virudhunagar district, Tamilnadu, India.

Extremely well organized and lucidly written book with an approach to explain the concepts in communicable languages. Suitable text book for the students of BCA, B. Tech., M.C.A., M.Sc., M Tech., etc.Each Chapter follows Objective type problems. Around 500 objective type problems (235) Multiple choice questions, 130 Fill in the blanks type, 135 True/False type with their answers to help Students understand very concept. Around 800 problems of various level of difficulty in exercises to review the understanding and testing the skills of the students after every section. Around 140 theorems to give better understanding and insights of the concepts. Topics are followed by figures and tables. In total more than 400 figures and 140 tables are taken to back the understanding of topics. Chapter includes: Combinatorics, Set Theory, Relations Functions, Group Theory, Rings and Fields, Logic, Lattices, Boolean Algebra, Graph Theory, Automata.

A Textbook of Mathematics

#### **Product Description**

This book is designed to serve as a textbook for the students taking this subject. It is a book with a difference from other textbooks as it lays more emphasis on the conceptual concepts that are supported by illustrative examples, plenty of challenging theory and programming exercises, to test your knowledge acquired on the subject.

While writing the book, special emphasis is given to keep the language very simple and lucid level of presentation is kept simple and illustrative so that even an average reader can grasp the subject matter with quite ease. Practically this book will provide you every things you need on the subject.

#### **Product Description**

Geoinformatics combines photogrammetry and remote sensing, image processing as well as other digital spatial data collection methods like GPS, field measurements, digitizing and scanning of maps, spatial data analysis algorithms and geographical data management, and visualization. It is one of the important tools that can help us to map and monitor the changes in the environment and on Earth, Geoinformatics, being multi-disciplinary in nature, is a fast growing area to solve real world problems by bringing together technologies and tools required for acquisition, exploration, visualization, analysis and integration of various spatial data. The main key feature of this book is that it concisely covers all the major topics of geoinformatics; Photogrammetry, Remote Sensing, GPS and GIS, so that UG & PG students and researchers can understand the theory of land data collection & mapping, and subsequently the analysis from these maps. The structure and character of spatial and non-spatial datasets are also described. The book covers basic geoinformatics tools and techniques which encompass a wide range of equipment, images and software, such as laser based devices, LiDAR, UAV/Drone, Aerial and terrestrial photographs, optical, Thermal, microwave and hyperspectral images, GPS, and GIS. The utility and application areas of these data collection techniques are presented in a simple language. This book will be extremely useful to students to understand the principles and theory of Geoinformatics that are crucial for several applications on the Earth surface.

#### **Product Description**

This book is students friendly. It also demonstrates how to solve the industry related problems that crop up in Chemical Engineering Practice. The chapters are organized in a simple way that enables the students to acquire an in depth understanding of the subject. The emphasis is given to the Basic concept of heat transfer, conduction, Insulations, Convection, Extended surface- Fins, Dimensionless group and Dimensional analysis, Heat transfer analogy, Heat transfer with phase change, Heat transfer equipment, Design of heat transfer equipment and Radiation, all coming under the realm of Process Heat Transfer. Apart from the numerous illustrations, the book contains review questions, exercises and aptitude test in Chemical Engineering which bridge the gap between theoretical learning and practical implementation. All numerical problems are solved in a systematic manner to reinforce the understanding of the concepts. This book is primarily intended as a text book for the under graduate students of Chemical Engineering. It will also be useful for other allied branches such as, Aeronautical Engineering, Mechanical Engineering, Petrochemical, Polymer Science and Engineering, Bio-technology as well as Diploma in Chemical Engineering. Key Features: \* Theoretical concept is explained with examples. \*Numerical problems are solved in systematic manner to reinforce the understanding of the concepts. \*Included a large number of diagrams illustrating industrial physical problems. \*Only essential theory is discussed under each topic. \* Stepwise procedure is given for solving problems under the topic of Chemical Equipment Design.

This book is designed to meet the requirements of the students of Mechanical Engineering and Automobile Engineering. It is based on the latest syllabi prescribed by different Technical Colleges and Universities in India. Each chapter is describes in simple, non-technical language and explains by clear illustrations that how engine parts and systems are constructed, how the part works, and what is required to maximize performance in terms of power, speed, economy and safety. The important short and long review questions which the are included at the end of each chapter are taken from previous semesters question papers of various Technical colleges and Universities. This book is intended to be used as a Text and for Reference by colleges and technical universities offering subjects like Automotive Engines and Internal Combustion Engines.

#### **Product Description**

The subject 'Elements of Mechanical Engineering' embraces 3 different fields of Mechanical Engineering, namely Thermodynamics, Strength of Materials and Theory of Machines. The book is written in simple and easy to understand language. The authors have ingeniously brought in situations encountered by common man in his day-today life, so as to generate interest in the reader for the subject which otherwise leaves him high and dry. In addition to this, every topic is supplemented with large no. of solved examples (more than 300 examples) which deals with every possible situation. At the end of each chapter, review questions have been added so that the students are made conversant with the type of compulsory questions they have to face in university exam. These are also followed by large no. of model problems.
