
An Introduction to Power System Stability, Control and Operation

Author :	R. Ramanujam
ISBN 13 :	978-93-55384-32-4
ISBN 10 :	93-55384-32-7
E-ISBN 13 :	978-93-55384-32-4
Edition :	1
Pages :	142
Type of book :	Paperback
Weight (g) :	300.00
Year :	2006
Language :	English
Publisher :	Khanna Publishing House
M.R.P :	Rs 199.00
Categories :	Electrical, Electronics & Communication Engineering, ISTE Series
SKU :	1725756075
Condition Type :	New
Country Origin :	India

Product Description

Power system in India have come a long way since independence. Growth of a power system indicates the health of the economy of a country. But it is accompanied by complexity and this complexity that power system stability and control are relevant. This book is organized into two sections. " Power System Stability" is covered in the first three chapters and " Power System Control" in the latter part of the book. Power system stability is perhaps the earliest dynamic problem the power system engineering had to deal with. It was referred to as "hunting" then. Since then, volumes have been written on this topic and even a preliminary treatment of the entire contribution is clearly out of scope of this book. This learning material is intended for the Electrical Engineering Graduates working professional in power utilities / Independent Power Plants (IPP) in the supervisory cadre and power system planning engineering / system operators / power transmission product manufacturers / Protection Engineers.

Table of Contents

Khanna Publishing House

4C/4344, Ansari Road, Daryaganj, New Delhi-110002

Author

Dr. Ramanujam obtained his Bachelor of Engineering in Electrical Engineering, Master of Technology in Power Systems, Master of Science in Electrical Engineering and Ph.D in Electrical Engineering from University of Madras, Indian Institute of Technology (Madras), University of Calagary, Canada and Indian Institute of Science, Bangalore in the years 1971, 1973, 1977 and 1986. His areas of interest include power system dynamics, transients application of non-linear system theory and real time simulation. He has authored several papers in international journals. He has worked with leading Consulting Engineering Ltd, Bangalore, Simulation Association Inc., Krupp Atlas Elektronik, Germany and International Development & Engg. Associates, Madras. Currently he is the Professor of Electrical Engineering in College of Engineering, Guindy, Anna University, Chennai.
